/COMPANY PROFILE

Boldly making our mark on the Italian design scene, our emerging lighting and décors Brand strives to push the boundaries of excellence and precision in traditional craftsmanship through rigorous research and the synergy of carefully selected local artisans.

Our journey starts from a compelling exploration of tradition, the artisan mastery, and that making full of charm, care, and perseverance that characterizes the finest Italian craftsmanship.

Therefore each Formaminima creation is crafted in those same places where the know-how is handed down and thoroughly kept for generations, exclusively in our territory. Carefully selected workshops, ateliers, and studios become our precious partners in the realization of every single piece, merging sought-after materials passion, re-visited production processes, and an innovative aesthetic.

LAMP
/ONE
BRASS

“Through the accurate creation of minimal objects able to inspire and intrigue, Formaminima is aimed at those admirers of an essential, sober and functional design”.

/MISSION

We create value through the masterly realization of unique pieces resulting from the direct collaboration between our designers and the excellence of Italian craftsmanship, along with its valuable know-how.

This collaboration aims at shortening and enriching each step of a local supply chain, from materials sourcing to manufacturing; in order to deliver high-quality products straight to the customer. Moreover, preserving the slow design process, as well as its fair research process and time needed to achieve the results expected, is essential to what we believe *good design* may be.

**/ARTISANAL
KNOW-HOW**

We choose the highest quality local materials, the excellence of craftsmanship informed by a contemporary design ethos.

The Master glazier ephemeral creations

The extra-clear crystal is carefully ground and finished by hand only, creating an object that, almost disappearing from view, becomes a container of light, allowing a wide and soft light diffusion in every type of environment.

The cabinetmaker secret

Expert hands, working sought-after wood surfaces tirelessly, obtaining an unparalleled quality: the result of decades of research and deep knowledge about this unique and sustainable material. Canaletto Walnut wood, Olive and walnut briarwood are the protagonists of this woodworking tradition.

The marvellous stone translucency

A cutting edge technique allows, between many others, the Calacatta, Green Alpes and Royal Pink Yellow marbles to reach such a thickness, to become permeable to light. The result is unforeseen light contrasts between veins and colour textures.

The Blacksmith precision

The satin brass, precious and durable over time, is entirely worked in our territory. The skills-full artisans of metal can exalt every detail with the utmost precision, turning solid brass surfaces joints into lightweight paper folds.

The *biscuit* thinness

The fine Porcelain from Limoges is made as thin as an eggshell, cut raw and then baked according to an innovative temperature-controlled technique, giving life to the elements that most characterize our lighting creations. Ultimately what makes our decorative objects valuable are the calibrated play of lights, softened by Porcelain warm nuances.

LAMP
/ONE
COLOUR EDITION

We chose to employ exclusively local materials, respecting, preserving and enhancing traditional techniques, such as marble-carving, crystal-glass grinding, Limoges porcelain mold-production. The *Colour-Edition Chandelier* shows handcrafted decorative hanging lamps realized through a selection of iconic Italian marbles, inspired by the most outstanding artistic movements of our Territory. These objects represented our tribute to *Edit Napoli 1st Edition* (June 2019).

Red Collemandina, original of Villa Collemandina, part of the “Appennino Tosco-Emiliano” National Park, is appreciated for its rich and intense chromatic tones. *Green Alpes* is extracted from the heart of Western Alps at 1.800 metres of altitude, in Val D’Aosta region. Its dramatic contrasts recall iconic architectures, thanks to its distinctive character. *Royal Pink Yellow*, belonging to the gentle landscape of Verona, is celebrated for its prestigious yet eclectic touch.

REVAMP EDITION

Inspired to the early '90s this outstanding eclectic Edition embraces sophisticated patterns, high-end handcrafted details and a contemporary sleek Design.

Carefully selected and locally sourced from our beautiful territory, the prized marbles: *Palissandro Blu Nuvolato* and *Arabescato Orobico* grey and orange recall forgotten atmospheres, counterbalanced by the cutting-edge industrial taste of burnished and brushed brass surfaces.

The final exquisite touch is given by the finest briarwoods of walnut and olive essences. Which represent a minimalistic reframing of the most exclusive Art Decò collections.

This Limited Edition is available in 250 pieces, numbered and signed.

BLACK EDITION

Portoro Gold marble, also known as “Black & Gold marble”, is the protagonist of this Formaminima Limited Edition, dedicated to this evergreen luxurious decorative stone. Recalling the ancient heritage of the Roman Empire, its quarries belong to the beautiful “Gulf of Poets” of Portovenere in Liguria-Italy. This prestigious polychromatic marble was employed in the decoration of Versailles castle in France, and several other remarkable historical buildings across Europe, throughout the 19th century. The velvety intense black background enriches and exalts the chromatic contrasts of large yellow-gold veins which cross the surface.

/SUSPENSION
LIGHTS

LAMP
/ONE
COLLECTION

The *Single Suspensions Serie* and *The Chandeliers Serie* are characterized by the same endless passion for fine-tuned details and statement design pieces, the genesis of the entire design process that led to the creation of the first Lamp/One Collection belongs to the world of Porcelain, to its delicate surface and structural characteristics.

Our first line of interior décor lighting was born from the exploration of two-dimensional porcelain geometries, aimed at researching the concept of lightness and thinness, bringing them to unforeseen results. Afterwards, this design journey was informed by endless curiosity, tireless research, a story about a light beam able to transform the features of a marble surface until turning it translucent, and a porcelain sheet as thin as an eggshell.

/TABLE LIGHTS

LAMP
/TWO
MARBLE

LAMP
/TWO
COLLECTION

For *Lamp/Two Collection*, our mission was bringing the light a step closer, keeping the previous *Lamp/One Collection's* curated material selection and high-end crafts techniques as a leitmotiv. As a result, solid Calacatta marble, Canaletto Walnut wood and satin brass are juxtaposed to and high-lighted by a minimal structure, realized through the employment of hidden joinery, unveiling only the intersections between sober surfaces and sought-after textures.

In this Collection, the sleek brass squared tubular, enriched by the golden nuance of a satin hand-finish, designs the silhouettes of these refined table lights. These orthogonal elements gently suspend the diffuser on a brass base, softly reflecting the coming downlight into the surrounding space. The precious diffuser stands at the centre of the attention, juxtaposed to the delicacy of a crystal shade, almost invisible in the dark, unveiling extra-thin porcelain geometries from Limoges. These translucid and ephemeral biscuit layers provide sophisticated and unexpected plays of light when touched by the coming down-light.

DÉCOR/S COLLECTION
-
LIMITED
EDITIONS

MIRROR/ZERO
COLLECTION

The *Mirror/Zero Collection* reinterprets and reframes the concept of a wall mirror, emphasising its décor statement function within the Interior lexicon. As a result, the cutting-edge aesthetic of this new series plays with the fading reflections of the subject, creating a *trompe-l'oeil* effect and indissolubly blending the objective and subjective dimensions through extra-thin material layers.

The careful selection of materials: hand-ground bronze or dark-grey crystal, walnut briarwood, solid marbles and brass, features a mirror gradient, thanks to an innovative experimental craft technique of surfaces layering. Furthermore, together with a frameless and sleek appearance, a faint tilt provides a further twist in the subject perception, increasing the engagement and highlighting the thinness and lightness of this unexpected two-dimensional composition.

CURIOSITÉ
DÉCOR BOXES
COLLECTION

*"THE POINT
ON THE CELESTIAL SPHERE
VERTICALLY ABOVE THE OBSERVER"*

CURIOSITÉ
DÉCOR BOXES
COLLECTION

The *Curiosité Collection* is inspired by imaginary scenarios, playing with the several reflections of crystal glass surfaces, masterly handcrafted and enriched by sought-after mirror shade finish. These minimalist and plain volumes invite the observer to pursue more than one preferred point of view, on the hunt for that perfect intersection where shapes, translucent surfaces and mirror finishes provide an unexpected *Trompe-l'oeil* effect; creating a visual continuity where the objects of this composition blend flawlessly and disruptively.

SUNRISE
ZENITH & DAZZLE

Sunrise, Zenith and Dazzle are part of the *Décor Boxes* series, representing the multiple variations of the abstract merge between the minimalist volumes tidily arranged on a squared tray and the imaginary solar rays which touch these latter.

In the attempt to conceptualise the light cast by a nordic sunrise, by the zenithal rays of a mid-day of summer, or the dazzle of the blue sea on a sunny afternoon at the beach. In this series, these imaginary rays are formally transposed into mirror shades, rigorously applied by hand on each piece, with a final effect able to twist the initial perspectives hierarchy and, by subtraction, draw the attention where the crystal translucency remains untouched by the mirrored hue.
