Jasper Morrison

Patricia Urquiola

Rodolfo Dordoni

Nanna &amp; Jørgen Ditzel

Doshi Levien

Ronan &amp; Erwan Bouroullec

Jasper Morrison, born 1959 in London, studied at the Royal College of Art in London. He pursued further studies at the Hochschule der Künste in Berlin on a fellowship. In 1986 he founded his own design studio in London. Jasper Morrison became a leading figure of "New Simplicity", a movement that advocated a more modest and also more serious approach to design. In addition to furniture, he has also created lamps, home accessories, textiles, a tram system for the city of Hanover.

A Spanish architect based in Milan, she stands out for the original designs of objects and furniture that she produces for the best and most important international firms. The designer of some of the most emblematic pieces in the current range, she created the Maia collection, one of her most characteristic works, for Kettal. *AD Architecture Design Award 2008*

Architect and designer, he was born in Milan. He designs for various companies: Artemide, Cappellini, Cassina, Minotti, Flos. Dordoni Architetti, founded with architects Alessandro Acerbi and Luca Zaniboni, deals with architectural planning and interior design, residential complexes, stores, restaurants, hotels, yachts, as well as exhibit stands of diverse commercial fields.

The Danish designers Nanna and Jørgen Ditzel exhibited their first furniture designs in Copenhagen when they were still students at the Industrial Arts and Crafts College, Copenhagen. When they completed their education as furniture designers, they married in 1946 and established a design studio. After Jørgen Ditzel's death in 1961, Nanna continued to design, and in 1968 she moved to London where she established the Interspace International Furniture and Design Centre.

Doshi Levien is an internationally acclaimed design studio founded by designers Nipa Doshi and Jonathan Levien. Nipa grew up in India and studied design at the National Institute of Design, founded on the manifesto by Charles and Ray Eames. Jonathan trained in fine cabinet making followed by industrial design. They met at the Royal College of Art and have been working together for over 10 years in their London studio.

The brothers Ronan and Erwan Bouroullec were born in Brittany in 1971 and 1976 respectively and have been working together since the mid-1990's. They are united by their quest for perfection, but at the same time it is also a constant challenge for two so very different personalities to work together. In 2007 they were discovered by Cappellini, a grand master of Italian design, who gave them their first industrial projects.

**Emiliana Design Studio****Michel Charlot****Konstantin Grcic**

After graduating from London's Central Saint Martins College of Art and Design with a master's degree in Industrial Design, they set up the Emiliana Design Studio in Barcelona in 1996. Ana and Emili's work is characterised by its ability to give each project a fresh conceptual approach, experimentation with materials, and for proactively involving the user without compromising functional, technical or production aspects. The ZigZag collection is an example.

Michel Charlot is a Swiss industrial designer born in Lausanne (1984). After graduating from the École in 2009, he worked for Jasper Morrison Ltd. In 2011, he set up his own practice, and started developing products for companies such as NAVA Design, L&Z, Belux, Kettal and Vitra. Several of his products were awarded with the *Design Preis Schweiz* and *Swiss Federal Design Award* which are the most prestigious Swiss design award given to industrial products.

Konstantin Grcic (1965) trained as a cabinet maker at the John Makepeace School (Dorset, England) and studied Design at the Royal College of Art in London. Konstantin Grcic defines function in human terms, combining formal strictness with considerable mental acuity and humour. Each of his products is characterized by a careful research into the history of design and architecture and his passion for technology and materials. Known for pared-down pieces, Grcic is often called a minimalist but the designer himself prefers to speak of simplicity.

**TRICONFORT**

# Enea

---

This design comes from the traditional chairs made of bulrush (enea) this universal design is very common in different parts of the world: from Mediterranean areas until places in north of Europe. Throughout the years many updates designs have been made: wood, plastic. Triconfort enea it's an outdoor version made in aluminium with synthetic fibers.

# Riba

---

Riba is a declaration of intentions and a clear tribute to designers such as Jean Prouvé, George Nelson and Friso Kramer. This collection mixes ancestral techniques such as the braiding of natural fibres with aluminium, a material that had its heyday in the fifties. Now, the metal frame replaces traditional wood, while natural fibre has been replaced with a synthetic material in order to provide greater weather resistance.

—  
1950

---

The 1950 collection combines wrought iron work with 21<sup>st</sup> century technology. The pieces, formerly shaped from heavy iron, are now ingeniously produced with aluminium, a much lighter material that is more weather resistant. Like any good design, their aesthetics come from their structure. A tribute to civil works built in the second half of the 19<sup>th</sup> century.

## Warranty terms

For domestic use, all products, except for cushions, covers and fabrics (including textilines), are guaranteed for a period of five years against any manufacturing defect that affects their suitability for use. This applies to normal conditions of use and maintenance. This guarantee does not apply to faults or imperfections resulting from the passage of time or normal wear and tear. Circumstances not covered by this guarantee include, but are not limited to, the fading or change in shade of colours, changes in wood texture, scratches resulting from use, etc. For non-domestic use, by the hotel and catering industry and collectives for example, all products, except cushions, covers and fabrics, are guaranteed for a period of two years. This guarantee is subject to the same conditions as outlined above.

## Technical specifications

Committed to innovation and quality, Kettal's collections are manufactured to the strictest quality standards, from the selection of the materials, to the quality and safety testing of the furniture.

## IMO Certification

Upon request, we can certify our products under the IMO standards.
