DESIGNED
TO BE
SOCIAL

DESIGNED TO BE SOCIAL

FROM OUR FIRST PROJECTS WE FELT THAT THE DESIGN OF OUR PRODUCTS SHOULD BE SOMETHING TO SHARE, TO ENJOY IN COMPANY. A FAMILY CONCEPT THAT EXTENDS TO THE URBAN, PUBLIC OR PROFESSIONAL COMMUNITY WITH A RECOGNISABLE, PRACTICAL AND UNFUSSY DESIGN: PRODUCTS MADE TO BE USED, SHARED, RECOMMENDED.

SALES TERMS

PRICES

Prices are expressed in euros (VAT excluded).

DELIVERY

Ex works. Goods transport is at the risk and peril of the buyer.

MINIMUM ORDER

Minimum order: 12 items (for chairs or stools) / 6 Tables

MINIMUM BILLING

Minimum billing amount: 600.00 net.

DELIVERY TIMES

Delivery times are indicative unless we explicitly confirm otherwise. Any delay cannot give rise to demands for compensation or to cancelling the order.

PAYMENT DEFERMENT

Goods sold with deferred payment are supplied with reservation of title until payment is completed. All disputes will be subject to the jurisdiction of the court of Treviso, Italy.

JURISDICTION

All disputes will be subject to the jurisdiction of the court of Treviso, Italy.

COMPLAINTS

Any complaint must be made within 8 days of receipt of the goods.

WEIGHTS, MEASUREMENTS AND COLOURS

Weights, measurements and colours are indicative. Infiniti reserves the right to make changes or improvements without notice.

HOW TO READ THE PRICELIST

This price list contains a series of technical information and use suggestions for those who intend to purchase or already have bought items belonging to the wide Infiniti range. The price list divides the collections into: chairs, armchairs, stools, tables. All indications here present are shown in triple language: Italian, English and Spanish. Infiniti reserves the right to modify or ameliorate the products without any prior advice.

HOW TO USE THE PRICE LIST

The pages of the price list contain all necessary information for a complete description of the product. In particular, for each item are displayed:

- Picture of the item;
- Name of product
- Chart with:
 - frame and seat/back or shell finishing for chairs and stools;
 - table structure and top finishing for tables;
 - prices VAT non included.
- Quantity of pieces contained in each carton box;
- All available colour finishing for seat/back or shell, frame and table top;
- Brief product description;
- Average product dimensions;
- All technical details describing unit package characteristics:
 - packaging volume;
 - quantity each carton box;
 - item weight;
 - product stacking capability;
 - certifications;
 - outdoor use capability.

Into the various colours representation it is shown the name of each colour. The same can be referred to the fabrics, leather colours and wooden finishing. Colours are purely indicative; kindly refer to the colour and finishing samples to make your choice.

NOTE

The cost of a product with customer fabric (COM) is obtained by applying the eco leather price. The cost of a product with customer leather (COM) is obtained by increasing the eco leather price by 10%. Fabrics supplied by the customer must contain indication of front and back, and must be 140 cm wide. C.O.M. fabrics must arrive here at OMP with no freight - custom charges (DDP). The fabric, leather, lacquer, glass and wood sample colour shades are intended as a guide only, as they can vary from batch to batch. Infiniti declines all liability for slight colour differences. These differences may be more evident in items ordered at a later stage to complete previous orders. Infiniti reserves the right to change or technically improve the design and specifications of any of its products at any time and at its discretion without prior notice. It also reserves the right to withdraw, suspend or cease production of any product at any time and at its discretion without prior notice. The measurements given in the price list are approximate. There may be a tolerance due to the type of materials used.

"INFINITI" MATERIALS

METALS

Metals are an important part of our products: they are used in order to realize frames for chairs and table structures. Infiniti has made a long and accurate research on materials and relative working technologies. In our factories we have reached elevated skills in steel and aluminium moulding/casting.

STEEL

Steel is used to produce frames for chairs and stools, by using round or squared tubes as well as solid rod all in high resistance. Furthermore, thanks to advanced technologies (laser 3D cutting machine), we are able to gain more complex shapes. Our products are available with different surface finishes and high quality standard. (painting, satin finishes, chromium-plating).

ALUMINIUM

This metal combines characteristics of lightness with an elevated resistance and

natural beauty of the surfaces. Aluminium surface can be anodized, a special treatment in order to increase the resistance to corrosion making the surface more opaque. Infiniti uses this metal in 3 different methods:

- Die cast: used to produce chair legs in the following finishes: polished - chromed - satin
- Anodized aluminium tube
- Extrusion.

PLASTIC MATERIALS

Infiniti, always interested in new technologies, heads to an innovative and updated development: for its production it uses both thermoplastic and thermosetting polymers. The plastic materials range from the polycarbonate to SAN to polypropylene, allowing the realization of a wide range of different finishes and characteristics. All the materials are recyclable in the respect of the environment.

POLYPROPYLENE PP

Its main feature is its high resistance to heat and abrasion. Furthermore it is non-toxic, antistatic, scratches and stains resistant. It has a high resistance to atmospheric agents, so is meant for outdoor usage.

WOOD

Infiniti works in the respect of all the national and international laws concerning the environment, this is achieved through the mutual cooperation with partners / suppliers that support the non-government organization FSC (Forest Stewardship Council) that operate in order to ameliorate sustainability of the forests all around the world. FSC certified companies are able to guarantee that the woods used in their production processes, come from forests that are managed properly and responsibly, in conformity with environmental - social and economical standards. Infiniti uses paints and glues of low formaldehyde emission, using rationally the raw material. The wood used is selected among the best present in the market. Its particular processing allow to guarantee resistance and last through time. Being a natural material, difference in colour can occur between each lot of wood, but these differences cannot be considered a flaw but on the opposite side a guaranty of the authenticity of the wood used.

SLICED ASH

It is an overlapping of ash-layers, that forms blocks which are later sliced perpendicularly to the direction of the various layer. The result is a surface that has a regular and homogeneous veining.

COMBINATION OF OAK

It is an overlapping of different light smooth layers of wood of the same kind that creates the same effect concerning the veining and the colours of the most valuable woods.

MULTI LAYERS

It is an overlapping of different sheets of sliced wood that are later glued together making a plywood.

3D MULTI LAYERS

It is an overlapping of different sheets of sliced wood that are later glued together making a single piece to be combined with the 3D engineered wood. This is a particular patented material meant to be bended in any complex 3 dimension shape without cracking.

FENIX NTM®

Innovative-nanotech material, ultra matt and soft touch- conceived for interior design. With low light reflection, its surface is highly matt, anti-fingerprints and pleasantly soft touch. The exterior side of FENIX NTM is obtained with nanotechnologies and is characterised by a surface treated with acrylic resins of new generation, hardened and bound through the Electron Beam Curing process. Thanks to these characteristics, Fenix NTM regenerates itself from any surface micro-scratches thanks to its thermo-repairing quality.

FABRICS

Infiniti uses fabrics that belong to a wide range of colours and patterns, which are all tested in order to achieve the best performance, among which resistance to abrasion and artificial light. The chair and armchair upholstery fabrics come in a wide range of bright colours. Fireproof fabric and imitation leather upholstery are also available. The Kvadrat collection, now available, offers top quality and high performance. The fabric can also be supplied by the customer.

LEATHER

Top quality European full-grain leather is used for the Infiniti upholstery. Several are the possibilities to choose among leather of different shades. It is soft and elegant but at the same time very resistant. It is the results of long stages of working. Leather is tanned with chrome and pigmented with resins in a water solution. Several are the tests made in order to achieve the right level of softness and elasticity.

RECYCLED FIBERGLASS (RFS)

The Recycled Fibreglass panel is made of recycled fiber-reinforced composites (fiberglass-kevlar-carbon fiber, etc) finely worked and re-aggregated a high pressure with minimum percentages of virgin adhesives. The procedure is patented and generates a double-green material, therefore recyclable again at end of life. In milling, the homogeneous density of the panel (1100 kg / m³) ensures robustness to the entire section, allowing processing three-dimensional without risk of defeat. The panel is a sustainable material certified by CSI. Fire reactions: Class 2 according to UNI 9177.

USAGE AND CARE

PLASTIC MATERIALS

Cleaning advices: Plastic surfaces usually needs to be cleaned with a normal cloth and warm water, we recommend not to use dry cloths otherwise the scratch might generate an electrostatic load that capture dust. For the most persistent stains a small amount of liquid soap diluted in water may be used. We recommend to avoid strictly the use of acetone, trichloroethylene, ammonia and detergents that contains even just a small amount of those substances as they can turn bright shiny surfaces into opaque very easily. We recommend as well to avoid all types of abrasive substances, like for example powdered cleaning products, creams, score pads and rough sponges. Usage: Avoid to drain on the surfaces objects that can scratch the material. We also remind that plastic cannot cope with warm surfaces of elevate temperatures placed directly on top of the item, an example might be not to place warm pans or pots.

PLYWOOD

Cleaning advices: Plywood surfaces usually needs to be cleaned with a normal cloth and warm water, we recommend always to dry immediately after the cleaning process. All liquids or other residue must be removed in order to avoid the absorption of the same. Usage: Being plywood a natural material you might notice an alteration in the colour shade during time and use. We also remind that plywood cannot cope

with warm surfaces of elevate temperatures placed directly on top of the item, an example might be not to place warm pans or pots; doing so can change the colour of the shell.

METALS

Cleaning advices: Plastic surfaces usually needs to be cleaned with a normal cloth and warm water, for the most persistent stains a small amount of liquid soap diluted in water may be used. We recommend always to dry immediately after the cleaning process by using a soft cloth or a leather one. Never use: cleaning products for steel ovens, chlorine, bleach, or other strong detergents. Avoid abrasive creams, score pads and abrasive sponges that can scratch the metal surfaces. Usage: Mind the stains of food such as coffee, juices, coke, if not removed immediately they might leave indeleible marks on the surface.

FABRICS

Cleaning: see care and washing advice on finishes. Usage: We remind you that fabrics are extremely delicates it is therefore very important to look carefully at the kind of wash suggested and pay particular attention while using because they are subject to be ripped or cut.

LEATHERS

Cleaning advices: Clean with a soft cloth with warm water. Usage: We remind that leathers are extremely delicates, it is therefore very important to look carefully at the kind of wash suggested and pay particular attention while using because they are subject to be ripped or cut. Exposition in spaces with an elevate percentage of humidity might cause structural modifications.

RECYCLABILITY

The Infiniti range is built for the majority in metal elements, plastic materials and in plywood, all materials 100% recyclable. Metal for example is one of the most recycled materials on planet hearth and allowed a saving of about a 95% of the energy otherwise used to obtain it from the raw material. The metals received are sent to dedicated centres to be divided into irony and non irony trough magnets, floating methods, air and manually. Chemical analysis might be done to divide further the rubbish. Non irony materials, such as aluminium, are pressed together in balls and sent back to the foundries. In the foundries the metals are melted again and the production process begin from point 0, returning into raw material, ready to be used for the production of brand new products. To re-use, recycle and recover are primary targets in the UE environmental policy that rules the usage of plastics materials, every day more parts that belongs to our normal lives. Plastic had a huge and global success in the past exactly for his characteristics, in fact plastic has the possibility to be moulded in any shape or dimension, throughout different technical solutions adapted according to the product: straining, mould injection, extrusion, injection. The main point of strength of this material are: lightness, workability. Our whole world seems like enveloped in a plastic film. The production of plastic in fact take only a 1,6% on the whole European consume of Oil. The most used materials are the one named thermoplastic, which are polymers that can be worked and moulded warm to be suddenly cooled in order to obtain the wanted shape. The process is absolutely reversible to guarantee an elevate recyclability. Plastic for his multiple uses properties can be found in many of the "Infiniti" products ranges. At the end of the use plastic can be reused in three main ways: the mechanical recycling meant to transform the material into another material; the plastic waste is becoming the starting point for the new products; the chemical recycling meant to transform the waste into raw material trough the melting of the same; the last is the energetic recovery contained into the plastic waste as oil derivate and therefore completely recyclable. Furthermore is only trough the recycling process that plastic can return to a new life. To make the process easier, Infiniti products are easily unassembled so that can be quickly recognised any basic element. Any plastic item produced is marked to identify the material used, according to the European legislations to guarantee the proper separation of the elements and their real and effective recycling.

CERTIFICATIONS AND REGULATIONS

Chairs, Tables and Stools by Infiniti are resistant and last various kinds of strains; for this reasons they are tested by CATAS Institute/ TUV or COSMOB to comply with requirements of UNI and UNI EN norms. On the following we have listed the UNI rules and respective tests that are carried out on chairs:

- UNI EN 1022 Norm (Stability),
- UNI EN 1728 (Static load on seat-back, fatigue resistance on seat-back, static load on side legs, impact on seat, impact on back, front seat edge resistance, vertical and horizontal static load on arm, fatigue on arm, static load on front legs).

Some products of Infiniti's collection are certified by GS mark. The GS or "Geprüfte Sicherheit" (tested safety) Mark is a voluntary certification mark applied to finished products that signifies their compliance with all of the statutory requirements of the German Product Safety Act (ProdSG). The scope of the GS Mark includes essential product characteristics such as electrical safety, chemical and hazardous material use, ergonomics and noise, and also covers an evaluation of a manufacturer's factory production. The GS Mark on a product remains valid provided that a manufacturer submits to an annual inspection of its production facilities.

ITA

CONDIZIONI DI VENDITA

PREZZI

I prezzi sono espressi in Euro (IVA esclusa).

RESA DELLA MERCE

Franco fabbrica. La merce viaggia a rischio e pericolo del committente.

ORDINE MINIMO

Ordine minimo: 12 Pezzi (sedie e sgabelli) / 6 tavoli.

IMPORTO MINIMO DI FATTURAZIONE

Importo minimo di fatturazione: € 600,00 netti.

TEMPI DI CONSEGNA

I tempi di consegna sono indicativi salvo nostra conferma esplicita. Eventuali ritardi non possono dar luogo a pretese di danni o annullamenti dell'ordine.

PAGAMENTO DILAZIONATO

La merce venduta con pagamento dilazionato è rilasciata con condizioni di riserva di proprietà fino a completo pagamento. Per ogni controversia è competente il foro di Treviso, Italia.

FORO COMPETENTE

Per ogni controversia è competente il foro di Treviso, Italia.

RECLAMI

Eventuali reclami devono essere comunicati entro 8 giorni dal ricevimento della merce.

PESI, DIMENSIONI E COLORI

Pesi, dimensioni e colori sono indicativi. Infiniti si riserva la facoltà di apportare modifiche o migliorie senza alcun preavviso.

LETTURA DEL LISTINO

Questo listino contiene una serie di informazioni tecniche e consigli d'uso per chi vuole acquistare o possiede già articoli facenti parte dell'ampia gamma Infiniti. Come visibile dall'indice, il listino suddivide le collezioni in: sedie, poltroncine, sgabelli, tavoli. Tutte le indicazioni presenti a listino sono presentate in triplice lingua: italiano, inglese e spagnolo. Infiniti si riserva la facoltà di apportare modifiche o migliorie al prodotto senza alcun preavviso.

COME UTILIZZARE IL LISTINO

Le pagine del listino contengono tutte le informazioni necessarie per una completa descrizione del prodotto. In particolare, per ogni prodotto sono indicati:

- Foto del prodotto;
- Nome dell'articolo;
- Tabella con:
 - finiture di telaio e scocca per sedie e sgabelli;
 - finiture della struttura e del ripiano per quanto riguarda i tavoli;
 - prezzi Iva esclusa.
- Quantità di pezzi contenuta in ogni cartone;
- Tutti i colori disponibili di scocca, telaio e ripiano;
- Una breve descrizione del prodotto;
- Le dimensioni di massima del prodotto;
- I dettagli tecnici che descrivono le caratteristiche per unità di imballo:
 - volume dell'imballo;
 - numero di pezzi contenuti in ogni imballo;
 - peso dell'articolo;
 - impilabilità dell'articolo;
- certificazioni attestate; possibilità di utilizzo del prodotto in esterni.

Nella rappresentazione dei vari colori è indicato il nome del colore. I colori sono puramente indicativi, attenersi ai campioni per effettuare la scelta.

NOTE BENE

Il costo di un prodotto in tessuto cliente (COM) si ottiene applicando il prezzo della ecopelle. Il costo di un prodotto con pelle cliente (COM) si ottiene aumentando il prezzo del 10% dell'ecopelle. Per tessuti forniti dal cliente, oltre all'indicazione del dritto e rovescio, si richiede l'altezza in cm 140. I tessuti ci devono pervenire con reso della merce DDP. I toni di colore a campionario, relativi ai tessuti, alla pelle, alle laccature, ai cristalli e alle essenze legno, sono indicativi, in quanto possono variare da partita a partita. Infiniti declina ogni responsabilità in relazione a leggere differenze di colore. Tali differenze possono essere più evidenti per ordini successivi a completamento. Infiniti si riserva il diritto di cambiare o tecnicamente migliorare design e specifiche di ogni suo prodotto in qualsiasi momento e a sua discrezione senza darne preventiva notizia. Si riserva inoltre il diritto di ritirare, sospendere o cessare la produzione di ogni suo prodotto in qualsiasi momento e a sua discrezione senza darne preventivo avviso. Le misure riportate a listino sono indicative. Vi può essere una tolleranza dovuta alla tipologia dei materiali impiegati.

MATERIALI "INFINITI"

I METALLI

I metalli costituiscono una parte importante dei nostri prodotti: vengono utilizzati per la realizzazione di telai di sedie e strutture di tavoli. Infiniti ha fatto una lunga e approfondita ricerca sui materiali e sulle tecnologie di lavorazione. Nei nostri stabilimenti abbiamo così raggiunto un'alta specializzazione nella lavorazione dell'acciaio e dell'alluminio.

ACCIAIO

L'acciaio è usato nella creazione delle strutture di sedie e di sgabelli, con tubolari a sezione quadrata e rotonda ad alta resistenza o con tondino. Inoltre, grazie a tecnologie avanzate (laser 3D), riusciamo ad ottenere forme sempre più complesse. I prodotti sono disponibili con diverse finiture superficiali ad elevati standard qualitativi (verniciatura, satinatura, cromatura).

ALLUMINIO

Questo metallo unisce doti di leggerezza con resistenza e naturale bellezza estetica delle superfici. La superficie dell'alluminio può essere anodizzata, un trattamento speciale che ha lo scopo di aumentare la resistenza alla corrosione rendendo la superficie più opaca. Infiniti utilizza l'alluminio in tre modi:

- Pressofusione: le gambe delle sedie laccate cromate o satinata;
- In tubo d'alluminio anodizzato;
- Estrusione.

LE MATERIE PLASTICHE

Infiniti, azienda all'avanguardia nel suo settore, punta allo sviluppo innovativo e tecnologico: per la sua produzione usa sia i polimeri termoplastici che termoindurenti. I materiali plastici spaziano dal policarbonato al san al polipropilene, permettendo la realizzazione di una vasta gamma di finiture e caratteristiche differenti. Tutti i materiali plastici sono riciclabili nel rispetto dell'ambiente.

POLIPROPILENE PP

La sua peculiarità principale è una elevata resistenza termica come pure all'abrasione; è inoltre atossico, antistatico, antimacchia ed antigraffio. Ha un'ottima resistenza agli agenti atmosferici permettendo così la produzione di oggetti che possono stare all'aperto.

I LEGNI

Lavoriamo nel rispetto delle norme nazionali ed internazionali per la salvaguardia dell'ambiente e ci avvaliamo di partner e fornitori che appoggiano l'organizzazione non governativa FSC (Forest Stewardship Council) che opera per migliorare la gestione delle foreste in tutto il mondo. Le aziende certificate FSC garantiscono che il legno contenuto nei loro prodotti, proviene da foreste gestite in maniera corretta e responsabile, secondo rigorosi standard ambientali, sociali ed economici. Utilizziamo vernici e colle a bassa emissione di formaldeide e usando razionalmente la materia prima. Il legno che utilizziamo è selezionato tra i migliori disponibili sul mercato e viene sottoposto ad una lavorazione particolare per garantirne resistenza e durata nel tempo. Essendo un materiale naturale si possono verificare differenze nella colorazione del materiale tra una partita e l'altra di legname, differenze che non sono da considerare come un difetto bensì come una garanzia dell'autenticità del legno utilizzato.

TRINCIATO DI FRASSINO

Consiste nella sovrapposizione di strati di frassino che formano dei blocchi i quali vengono tranciati perpendicolarmente alla direzione dei vari strati, così facendo si ottengono venature regolari e omogenee.

PRECOMPOSTO DI ROVERE

Si ottiene sovrapponendo diversi strati di piattacci sottili di legni della stessa specie che creano lo stesso effetto a livello di venatura e colori di legni più pregiati.

MULTISTRATI A 3D

Si ottiene sovrapponendo vari fogli di tranciato di legno che vengono incollati a fibra incrociata formando così un compensato unito al precomposto 3D, trattati di un materiale speciale brevettato che si curva nelle 3 dimensioni senza rotture.

FENIX NTM®

Materiale innovativo - nanotech, super opaco - creato per l'interior design. Con una bassa riflessione della luce, la sua superficie è estremamente opaca, anti impronte digitali e piacevolmente soft touch. La parte superiore di FENIX NTM® NTM è ottenuta con l'ausilio di nanotecnologie ed è caratterizzata da una superficie trattata con resine acriliche di nuova generazione, indurite e fissate attraverso il processo di Electron Beam Curing. Grazie a queste caratteristiche FENIX NTM® si rigenera da eventuali micrograffi superficiali grazie alla termoriparabilità.

I TESSUTI

I tessuti che utilizziamo appartengono ad una ampia e articolata gamma di colori e fantasie, tutti assolutamente testati con l'obiettivo di ottenere le migliori caratteristiche prestazionali, tra le quali resistenza all'abrasione e resistenza alla luce artificiale. Utilizzati per rivestire sedie e poltrone, sono offerti in una vasta gamma di colori accessi e brillanti. Disponibile la collezione Kvadrat sinonimo di massima qualità e affidabilità. Disponibile la categoria di tessuto ignifugo e rivestimenti in finte pelli. E previsto anche il tessuto cliente.

LE PELLI

Le pelli che caratterizzano i rivestimenti delle creazioni Infiniti sono di assoluta qualità, come le pelli fiore provenienti da bovini europei. Numerose sono le possibilità di scelta tra pelli di tonalità diverse. Morbide ed eleganti, ma al tempo stesso molto resistenti: sono il risultato di lunghe fasi di lavorazione. La pelle viene conciata al cromo e pigmentata con resine in soluzione acquosa e per ottenere il giusto grado di morbidezza ed elasticità sono numerosi i test a cui i campioni di pelle vengono sottoposti.

RECYCLED FIBERGLASS

Il pannello Recycled Fiberglass è realizzato in compositi fibro-rinforzati riciclati (vetrosina-kevlar-fibra di carbonio, etc) finemente lavorati e riaggregati a pressione elevata con percentuali minime di collanti vergini. Il procedimento è brevettato e genera un materiale double-green, quindi nuovamente riciclabile a fine vita. Nella fresatura, la densità omogenea del pannello (100 kg/m³) garantisce robustezza all'intera sezione, permettendo una lavorazione tridimensionale senza rischio di sfilamento. Il pannello recomplax™ T100 è un materiale sostenibile certificato da CSI. Reazioni al fuoco: Classe 2 secondo la UNI9177.

USO E MANUTENZIONE

Per una manutenzione ottimale dei prodotti Infiniti e per mantenere inalterate le caratteristiche dei materiali con cui sono realizzati, sono necessarie alcune semplici attenzioni:

LE MATERIE PLASTICHE

Pulizia: le superfici in plastiche vanno generalmente pulite con un panno umido e soffice imbevuto di acqua, è sconsigliato l'uso di panni asciutti che con lo sfregamento potrebbero caricare elettrostaticamente la superficie plastica attirando polvere. Per le macchie più ostinate è possibile diluire in acqua del sapone liquido neutro con moderazione. Evitare assolutamente l'uso di acetone, trielina, ammoniaca o detersivi che contengono anche solo una piccola quantità di questi detersivi perché possono opacizzare la lucentezza delle superfici. Evitare nel modo più assoluto tutte le sostanze abrasive, come i detersivi in polvere, le paste abrasive, le pagliette o spugne ruvide. Uso: evitare di trascinare sulle superfici oggetti che possono rigare il materiale. Si ricordi in oltre, che i materiali plastici non possono sopportare fonti di calore diretta sulla superficie, come il contatto diretto con pentole e tegami.

I LEGNI

Pulizia: pulire con un panno umido e soffice imbevuto di acqua tiepida. Asciugare sempre dopo la pulizia. Rimuovere immediatamente eventuali sostanze liquide o altri residui per evitare l'assorbimento. Uso: le superfici in legno, essendo lo stesso un materiale naturale, potrebbero subire delle alterazioni di colore con l'utilizzo e nel tempo. Si ricordi che i legni non possono sopportare fonti di calore diretta sulla superficie, come appoggiare pentole e tegami direttamente sulla superficie. L'esposizione duratura potrebbe alterarne la colorazione.

I METALLI

Pulizia: sia le superfici metalliche in acciaio o alluminio che le superfici verniciate devono essere pulite con un panno umido e soffice imbevuto di acqua calda; per le macchie più ostinate è possibile diluire in acqua del sapone liquido neutro, con moderazione. Asciugare sempre dopo la pulizia con un panno morbido o con pelle di daino. Non usare creme e paste per pulire forni in acciaio, non usare cloro, non usare candeggina ed altri detersivi aggressivi. Sconsigliato usare paste abrasive, pagliette e spugne abrasive che possono graffiare le superfici metalliche. Uso: fare attenzione a macchie di alimenti come il caffè, succhi di frutta, cola che se non vengono rimossi immediatamente possono lasciare macchie indelebili sulla superficie.

I TESSUTI

Pulizia: consultare i consigli per la manutenzione e lavaggio nelle finiture. Uso: ricordiamo che i tessuti sono delicati, è importante prestare attenzione al tipo di lavaggio consigliato e prestare cura durante l'uso poiché soggetti a strappi o tagli.

LE PELLI

Pulizia: pulire con panno morbido imbevuto di acqua. Uso: ricordiamo che la pelle ed il cuoio sono delicati; è importante prestare attenzione al tipo di pulizia consigliato e prestare cura durante l'uso poiché soggette a strappi o tagli. L'esposizione in ambienti o luoghi con alto tasso di umidità può causare modificazioni della struttura.

RICICLABILITÀ

La gamma dei prodotti Infiniti è costituita per la maggior parte da elementi in metallo, in materiale plastico o in legno, tutti materiali interamente riciclabili. Il metallo ad esempio è il materiale tra i più riciclati al mondo e permette di risparmiare il 95% dell'energia che si utilizza normalmente per produrlo dalla materia prima. I metalli raccolti vengono avviati in appositi centri per essere divisi in ferrosi e non ferrosi mediante magneti, metodi di flottazione, aria e manualmente. Analisi chimiche possono essere effettuate per suddividere in modo omogeneo i rifiuti. I materiali non ferrosi, tra i quali il più importante è l'alluminio, vengono pressati in balle e inviate alle fonderie. Qui i metalli sono fusi e il processo di produzione del metallo ricomincia dall'inizio, tornando materia prima, pronta per essere utilizzata per la produzione di nuovi prodotti. La riutilizzabilità, riciclabilità e recuperabilità sono obiettivi importanti della politica UE dell'ambiente che regola l'impiego delle materie plastiche, ormai parte integrante della nostra vita quotidiana. La plastica ebbe a suo tempo un successo immediato e globale proprio per le sue caratteristiche distintive, la plastica infatti ha la possibilità di essere modellata in qualsiasi forma e dimensione, attraverso tecniche di lavorazione diverse a seconda del prodotto: per colata, per stampaggio, per estrusione, per iniezione. I suoi più importanti punti di forza sono: leggerezza e lavorabilità. Il nostro mondo sembra ormai essere avvolto in un foglio di plastica. La produzione di plastica incide infatti solo per il 1,6% sul consumo europeo di petrolio. Le materie sintetiche più utilizzate sono quelle dette termoplastiche, ovvero polimeri che possono essere lavorati e modellati a caldo e raffreddati bruscamente per mantenerne la forma voluta. Il processo è reversibile garantendone così l'elevata riciclabilità. La plastica per le sue svariate proprietà, è presente in molteplici prodotti "Infiniti". Alla fine del suo utilizzo, la plastica può essere riutilizzata secondo tre modalità fondamentali: il riciclaggio meccanico, che prevede la trasformazione da materia a materia; il rifiuto di plastica diventa il punto di partenza per nuovi prodotti; il riciclaggio chimico che prevede il ritorno alla materia prima di base attraverso la trasformazione dei rifiuti di plastiche in materia da utilizzare nuovamente nella produzione; il recupero energetico, cioè utilizzo dell'energia contenuta nei rifiuti plastici, che deriva dal petrolio e che è interamente sfruttabile. E attraverso il riciclaggio, dunque, che la plastica può tornare a nuova vita. Per semplificare il processo di riciclaggio, i prodotti Infiniti sono facilmente disassemblabili e riconducibili ad elementi monomaterici. Sugli elementi in plastica sono impressi marchi di identificazione secondo le normative europee per consentire la corretta separazione degli elementi ed il loro effettivo riciclo.

CERTIFICAZIONI E NORMATIVE

Sedie, Tavoli e Sgabelli Infiniti sono resistenti e sopportano sollecitazioni di varia natura; per questo motivo vengono testati dall'ente Catas per soddisfare i requisiti delle normative UNI e UNI EN. Per il settore domestico è sufficiente il raggiungimento del 3° livello. Di seguito elenchiamo le normative di riferimento UNI e le relative prove che vengono eseguite sulle sedie: Normativa UNI EN 1022/98 (Stabilità); Normativa UNI EN 1728/00 (Carico statico su sedile-schienale, resistenza a fatica del sedile-schienale, carico statico sulle gambe laterali, urto sul sedile, urto sullo schienale, resistenza del fronte anteriore del sedile, carico statico verticale ed orizzontale sul bracciolo, fatica del bracciolo, carico statico gambe anteriori).

Alcuni prodotti della collezione Infiniti hanno ottenuto la certificazione GS. Il marchio GS o "Geprüfte Sicherheit" (sicurezza comprovata) è una certificazione volontaria basata sulla legge per la sicurezza dei prodotti (ProdSG) vigente in Germania e indica la conformità di un prodotto agli standard di sicurezza validi sia nel paese stesso che in Europa. Riconosciuto a livello globale, anche nella supply chain, così come il marchio TÜV SÜD il marchio GS viene rilasciato al completamento del relativo programma di verifica e ispezione e rimane valido a condizione che venga eseguita ogni anno un'ispezione di controllo sulla produzione. L'ottenimento del marchio GS dimostra l'impegno di un'azienda per la salvaguardia della salute dei consumatori e incrementa l'affidabilità dei prodotti.

SYMBOLS

Indicates that the product has passed the stress resistance tests, and has therefore been certified.

Indicates that the product is stackable.

TONDINA PCR

THANKS TO THE PRODUCTION TECHNIQUE AND THE DIFFERENT COMPOSITIONS OF PLASTIC, THE FINAL EFFECT ON THE PRODUCT WILL ALWAYS LOOK DIFFERENT FROM A CHAIR TO ANOTHER, EVEN IF THEY WILL BE PRODUCED IN SERIES.

NEW PRODUCTS

NEW MATERIALS, FABRICS AND SHAPES ENRICH THE ALREADY WIDE VARIETY OF INFINITI, FITTING HARMONIOUSLY INTO CONTRACT PROJECTS CHARACTERIZED BY HIGH DESIGN. WE PRESENT NEW CHAIRS AND TABLES CREATED TO ENCOURAGE RELATIONSHIPS, GOOD VIBES AND HARMONY, IN ENVIRONMENTS DESIGNED TO BE SOCIAL.

SICLA

DESIGN:

CLAUS BREINHOLT

SICLA IS A RIGID "BUCKET" CHAIR, MADE OF A COMFORTABLE LIGHTWEIGHT AND THIN SHELL. TO PROVIDE STRENGTH THE EDGES AROUND THE SHELL HAVE BEEN CURVED. TO AVOID THE "HOLLOW" SENSATION OF THE SHAPE, A RIB WAS INSERTED AROUND THE BACK OF THE CHAIR, LEADING OUT INTO THE ARMREST AND GIVING STABILITY.

NEW PRODUCT

SHELL
PP503
Powder blue

FRAME
AC31
Black matt painted

—
THE RIB IN THE BACK PROVIDES STABILITY TO THE REST OF THE CHAIR, GIVING ALSO A GOOD GRIP ON THE ARMREST WHEN LIFTING IT.
THIS MAKES SICLA THE PERFECT CHAIR FOR COMMERCIAL ENVIRONMENTS.
THE SHELL CAN HAVE UPHOLSTERED SEAT PANEL OR FULL UPHOLSTERY.

EASTWOOD

DESIGN:

ANDREAS OSTWALD

IN THE NEW EASTWOOD CHAIR, A SOLID ASH STRUCTURE MEETS POLYPROPYLENE, CREATING AN INTRIGUING INTERSECTION OF SINUOUS LINES. THE SLIGHTLY CURVED BACK PANEL REST GENTLY ON THE FRAME, MAXIMIZING COMFORT. THE COLOR PALETTE FOR THE SEAT AND BACKRESTREST MAKES EASTWOOD MATCHABLE TO ANY CLASSIC AND MODERN SETTING.

NEW PRODUCT

THE CHAIR FRAME IN NATURAL OR BLACK STAINED ASH GENTLY SUPPORTS THE BACKREST AND RECALLS THE COLORS, THANKS TO THE MATCHING POLYPROPYLENE INSERTS.

FELUCA

DESIGN:

BROGLIATOTRAVERSO

THE FELUCA HAT ("BECORN HAT" IN ENGLISH) IS AN ANCIENT HEADGEAR USED IN THE EIGHTEENTH CENTURY AND CHARACTERIZED BY TWO DOWNWARD CURVED EXTREMITIES. IT IS NO COINCIDENCE IF BROGLIATOTRAVERSO CHOSE THIS NAME FOR THEIR NEW CHAIR, SINCE THE BACK PANEL HAS A SHAPE THAT STRONGLY REMINDS IT. THIS PARTICULAR DESIGN GIVES A SENSE OF MOVEMENT, ERASING ANY RIGIDITY AND ENHANCING HARMONY AND REFINEMENT.

EKKI

DESIGN:

mC.dsg

MC.DSG WANTS TO PAY HOMAGE TO EARLY TWENTIETH CENTURY DESIGNERS WITH EKKI, A CHAIR WITH A RETRO DESIGN. ENRICHED BY CONTEMPORARY ELEMENTS SUCH AS THE METAL DETAIL PLACED ON THE BACK SIDE OF THE RECTANGULAR BACKREST, AND THE VISIBLE ASSEMBLY COMPONENTS.

NEW PRODUCT

*FRAME***LR03***Natural oak**SEAT AND BACKREST***LR03***Natural oak**DETAIL***AC44***White fine textured*

—
THE WARM TEXTURE OF OAK WELCOMES A DETAIL
ON THE BACK OF THE BACKREST: AN ELEMENT IN
PAINTED STEEL THAT CAN BECOME ALSO AN ELEGANT
ARMREST.

RUELLE

DESIGN:

PHILIPPE TABET

RUELLE SHOWS OFF IN A BRAND NEW VERSION: THE POLYPROPYLENE OR PLYWOOD BACKREST MATCHES WITH A DELICATE NUDE ALUMINUM BODY WITH CONTRASTING LEGS. THE RESULT IS A DISTINCTIVE INDUSTRIAL MOOD, MAKING THIS CHAIR PERFECT FOR CONTEMPORARY RESTAURANTS, BARS AND BISTROS.

NEW FINISHES

ALUMINUM IS MANUFACTURED IN TWO DIFFERENT PROCESSES: THE LEGS ARE IN ANODISED EXTRUDED ALUMINUM, WHILE THE SEAT AND BACKRESTREST SUPPORTS ARE IN DIE-CAST ALUMINUM.

DESIGN:

THOMAS PEDERSEN

THE SIMPLEST BUT MOST REFINED OF THE STOOLS IS REINVENTED IN THE 45 CM HEIGHT VERSION, PERFECT FOR ALL CONTEXTS IN WHICH IT IS NECESSARY TO HAVE AN EXTRA SEAT AVAILABLE WITHOUT TAKING UP TOO MUCH SPACE. THE WIDE CHOICE OF FINISHES FOR THE BASES AND THE ENDLESS UPHOLSTERY OPTIONS MAKES KLEJN PERFECT FOR BOTH INTERIOR AND EXTERIOR SETTINGS.

RECORD LIVING

DESIGN:

mC.dsg

RECORD LIVING IS THE INNOVATIVE DESIGN TABLE THAT COMBINES STYLE AND VERSATILITY THROUGH THE INTERSECTION OF SIMPLE ESSENTIAL LINES. THE PRACTICAL INTERLOCKING LEG, WITH POINTED ENDS, GIVES THIS TABLE A SUGGESTIVE AND ELEGANT TOUCH. NOW THE TABLE TOP IS NOW AVAILABLE WITH A NEW OVAL SIZE.

THE RECORD LIVING FAMILY ENRICHES ITS RANGE WITH A NEW VERSION: A STEEL STRUCTURE AND A POST-CONSUMER PLASTIC TOP THAT MAKE THE TABLE IDEAL FOR OUTDOOR USE.

SYMBOLS

Fireproof.

Hand wash at max temperature indicated.

Do not wash.

Do not bleach.

Dry clean with usual solvents, based on perchloroethylene, solvent R113 and hydrocarbon (no trichloroethylene).

Iron. The dots in the centre of the symbol indicate the temperature: One dot: iron cold (110°): acrylic, nylon, acetate. Two dots: iron warm (150°): polyester, wool. Three dots: iron hot (200°): cotton, linen.

Do not tumble dry.

Infinitti reserves the right to change or technically improve the design and specifications of any of its products at any time and at its discretion without notice.
